Kit 110 - VerTmax 30ft / 9m Compact Kit

Description:

Kit 110 is the VerTmax 30ft / 9m compact telescopic pneumatic pole kit which delivers a Grappling Hook and Ascending Ladder to a height of up to 30ft / 9m. The VerTmax is designed for Urban Method of Entry and Ship Boarding. Manufactured from 6061-T6 Black Anodized Aircraft Aluminium, the VerTmax is light-weight, compact and corrosion resistant. Kit 110 is built with additional sections to decrease the collapsed length of the standard 9m VerTmax.

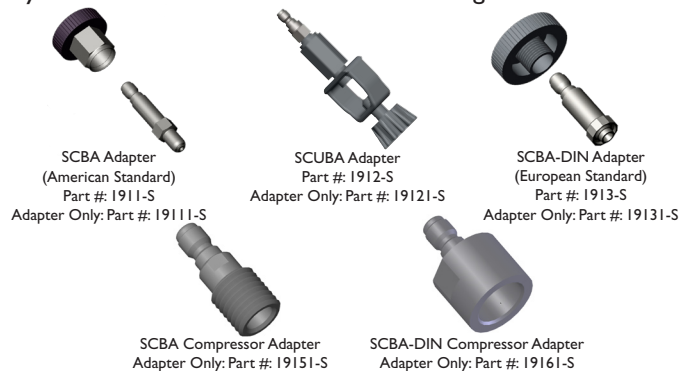

This kit comes with two Titanium Grappling Hooks. The Ledger Style Grappling Hook is designed to attach to ledges, parapets, or window sills. The Pipe Style Grappling Hook is designed to attach to pipe railings. Grappling Hook Rollers are included to assist in navigating up wall faces or the hulls of ships. The 30ft / 9m Tactical Ladder is constructed of nylon sides and fiberglass rungs.

The System Reservoir has a service pressure of 2,000 psi / 140 BAR. One charge of air can lift the pole several times. The VerTmax Filler Hose facilitates charging the System Reservoir with compressed air from an Air Compressor, SCBA Tank, or SCUBA Tank. The kit comes complete with a Rigid Transport / Storage Case giving it a competitive tactical edge. Optional Accessories include the VerTmax A/V Surveillance System and the VerTmax Buoyancy Collar.

Shipping Dimensions: 58" x 17" x 13" - 72 lbs

Adapter Choices for ResQmax Product Line

Below are the adapters available with the Filler Hose Assembly for your unit. Please select from the following choices.

Kit Contents:

- 1 of Part # 1300 VerTmax Reservoir Assembly
