Kit 420 - RASing / UNREPS Kit

Description:

The ResQmax Kit 420 is a Replenishment At Sea (RASing) / Underway Replenishment (UNREPS) Kit supplied with two payloads and all the accessories required to operate your ResQmax. The Dacron Line is a messenger line which allows for long range horizontal deployment distances of 300ft / 92m. This line can be used to tow larger, stronger ropes from ship-to-ship or ship-to-shore.

The Streamline Training / RASing Projectile has a high density urethane cover which absorbs the shock of impact with a hard surface and reduces the projectile 'bounce'. The ResQmax Streamline Filler Hose facilitates charging the Projectiles with compressed air from an Air Compressor, a SCBA Tank, or a SCUBA Tank. The service pressure of these RASing Projectiles is 3,000psi / 207 BAR.

This kit comes complete with spares and a Kit Carry Bag. Optional accessories include the ResQmax Tool Kit and a Rigid Transport/Storage Case. Additional projectiles and lines are available with all of the ResQmax Kits.

Shipping Dimensions: 25" x 21" x 14" - 26lbs

Adapter Choices for ResQmax Product Line

Below are the adapters available with the Filler Hose Assembly for your unit. Please select from the following choices.

KIT CONTENTS:

- 1 - Part #500 ResQmax Launcher (Red)
