Kit 420 - RASing / UNREPS Kit (Lance Amares)

NSN No: 1095-14-535-7304 - RSI Cage Code: 1J6A7

Description

The ResQmax Kit 420 is designed for Replenishment At Sea (RASing)/ Underway Replenishment (UNREPS) - establishing a messenger line between two vessels underway.

Each standard kit is supplied with two payloads and all the accessories required to operate the ResQmax.

The standard Dacron messenger line allows for a horizontal deployment distances of 92m/300ft and has a breaking strain of 500lbs/227kg. An optional Spectra line with a breaking strain of 1,500lbs/680kg is available.

The Streamline Training/RASing Projectile has a service pressure of 207 Bar/3,000 psi and is protected by a high density urethane cover which absorbs the shock of impact with a hard surface and reduces the projectile 'bounce'. These projectiles may be pressurized from an Air Compressor, an SCBA Tank, or a SCUBA Tank. An optional luminous projectile cover for deployment in dark conditions is also available.

This kit comes complete with miscellaneous spares and a Kit Carry Bag. Optional accessories include the ResQmax Tool Kit and a Rigid Transport/Storage Case. Additional projectiles and lines are available with all of the ResQmax Kits.

Shipping Dimensions: 25 x 21 x 14" - 26 lbs
